BrightTV Viewership Analysis

- Prepared by: MOJALEFA MOLATLHEGI
  - Objective: Grow subscription base

The purpose of this analysis is to provide valuable business insights for Bright TV using available performance and viewership data. As a Junior Data Analyst, the objective is to evaluate content performance, identify audience engagement patterns, and determine which programs or time slots generate the highest viewership. By applying data analysis techniques and structured queries, this study aims to uncover trends that will support the newly appointed CEO in making informed strategic decisions. The insights gathered will help improve content scheduling, increase audience retention, and ultimately drive revenue growth for the business.
